ACADEMIC PROJECTS

- ➢ **Single Vote Enforcement System**

    Project aims to develop a secure voter registration and balloting system to ensure transparent and trustworthy elections. Voter data is securely registered and verified by the election commission, generating a unique QR code for each voter. On election day, the QR code activates to provide secure access to an E-ballot, which the voter submits privately. After voting, the QR code is deactivated to prevent misuse. This system enhances election integrity, security, and public trust.
